New in v19 - Retrospect Cloud Storage for Integrated Off-site Ransomware Protection, OS Compliance Monitoring, Enhanced Anomaly Detection

Retrospect Backup protects over 100 Petabytes in over 500,000 homes and businesses in over 100 countries. With broad platform and application support, Retrospect protects every part of your computer environment, on-site and in the cloud. Start your first backup with one click.

Ransomware Protection

Ransomware attacks are increasingly sophisticated, having the capability of watching for cloud account credentials, deleting backups and cloud storage, then encrypting everything and demanding a ransom. It's imperative to build defenses against this escalating attack. Retrospect Backup 18 makes it easy to add an immutable retention policy with Amazon S3.

Anomaly Detection

Organizations need to detect ransomware as early as possible to stop the threat and remediate those resources. Anomaly Detection in Retrospect Backup identifies changes in an environment that warrants the attention of IT. Administrators can tailor anomaly detection to their business's specific systems using customizable filtering and thresholds for each of their backup policies, with aggregation on Retrospect Management Console.

Retrospect Cloud Storage

Theft and disaster have always been important reasons for offsite backups, but today, ransomware is the greatest threat, infiltrating businesses around the world. Retrospect Cloud Storage integrates seamlessly with Retrospect with fast transfer rates, support for immutable backups and anomaly detection for ransomware protection, and simple setup and pricing. Retrospect also supports dozens of cloud storage providers in a couple clicks, letting you off-site your backups.

Complete Data Protection

With cross platform support for Windows, Mac, and Linux, Retrospect offers business backup with system recovery, local backup, long-term retention, along with centralized management, end-to-end security, email protection, and extensive customization—all at an affordable price for a small business.

"I have had to work with just about every other product on the market. Retrospect beats them all hands down."

Johan Vos - The Jupiter Drawing Room

Supported Systems

Retrospect Backup supports the following Microsoft Windows and Apple macOS operating systems for local and client backup and the following Linux operating systems for client backup.

Microsoft Windows

- Windows 11, 10, 8.1, 8, 7, Vista
- * Windows XP (client only)
- Windows Server 2003, 2008, 2012, 2012, 2016, 2019, 2022
- Windows Server Essentials 2012
- Windows SBS 2003, 2008, 2011
- Windows Storage Server 2003, 2008

Applications

- Microsoft Exchange 2003, 2007, 2010, 2013, 2016, 2019
- Microsoft SQL Server 2005, 2008, 2012, 2014, 2016, 2019 CTP 2
- Email: Gmail, AOL, Yahoo, Outlook.com, iCloud, G Suite Mailbox, Office 365 Mailbox, Exchange, Zoho, Comcast, DoveCot, IceWarp

Editions

- **Multi Server:** Protects any number of networked Windows, Mac, and Linux servers, desktops, and notebooks from a single host machine.
- **Single Server Unlimited:** Protects one server and any number of networked Windows, Mac, and Linux desktops and notebooks from a single host machine.
- **Single Server 20:** Protects a single Server and twenty workstations from a single host machine.
- **Single Server 5:** Protects a single Server and five workstations from a single host machine.
- **Essentials/SBS (Windows only):** Protects a single Windows Server running Windows Server Essentials plus unlimited desktop and laptop workstations from a single host machine. Includes protection for Microsoft Exchange and Microsoft SQL, Open File Backup, and Dissimilar Hardware Restore.
- **Desktop:** Protects a single non-server host computer and up to five additional Windows, Mac, and Linux desktops and notebooks.
- **Solo:** Protects a single non-server computer and its external hard drives. Network attached storage (NAS) storage, tape, and optical are not supported.

Licensing

Monthly subscription, yearly subscription, and perpetual.

Apple OS X / macOS

- macOS Big Sur / Big Sur Server 11
- macOS Catalina / Catalina Server 10.15
- macOS Mojave / Mojave Server 10.14
- macOS High Sierra / High Sierra Server 10.13
- macOS Sierra / Sierra Server 10.12
- OS X El Capitan / El Capitan Server 10.11
- OS X Yosemite / Yosemite Server 10.10
- OS X Mavericks / Mavericks Server 10.9

Cloud Storage Providers

- Retrospect Cloud Storage with 13 locations (19.1)
- Global Partners: Amazon S3, Microsoft Azure, Blob Storage, Google Cloud Storage, Wasabi, Dropbox, DigitalOcean Spaces
- Regional Partners: Backblaze B2, Wasabi, Dream-Host, Aufiero Informatica, PCExtreme, Aqua Ray, MCT, Cynny Space, Dunkel, IONOS, Numergy, ArubaCloud, Swisscom
- On-Premis Private Cloud: Synology, QNAP, Minio, Zenko, SwiftStack, OpenIO, Cloudian

Linux

- CentOS 6.4, 6.5, 7, 7 Update 3
- Red Hat Enterprise Linux 7, 7 Update 3
- Debian 7.6, 8, 9
- Ubuntu Server 14.04, 15, 16, 17
- SUSE 11 Enterprise Server 11 SP2 and SP3, 11.4, and 12.2

Storage Devices

- Cloud storage
- Hard drives
- Network attached storage devices
- Tape drives
- Tape libraries
- * Removable disk drives (RDX, REV, etc.)

See the Retrospect Devices for a complete list of the 2,000+ supported tape drives and libraries at <https://www.retrospect.com/devices>.

About Retrospect, Inc.

Retrospect Backup has been protecting data for small and medium businesses for thirty years. We support businesses where they are, with local sales representation and thousands of partners across the world, on six continents and seven languages.
